

ACCESSIBILITY PLAN

Dishforth VC CE Primary School and Nursery

Aims

Schools are required under the Equality Act 2010 to have an accessibility plan. The purpose of the plan is to:

- Increase the extent to which disabled pupils can participate in the curriculum.
- Improve the physical environment of the school to enable disabled pupils to take better advantage of education, benefits, facilities and services provided.
- Improve the availability of accessible information to disabled pupils.

Our school aims to treat all its pupils fairly and with respect. This involves providing access and opportunities for all pupils without discrimination of any kind.

Our school is committed to promoting equality, diversity, and inclusion in line with the **Equality Act 2010** and the expectations set out in the **Ofsted Education Inspection Framework**.

We uphold the following principles:

- Compliance with the Equality Act 2010: We actively work to eliminate discrimination, harassment, and victimisation, and we make reasonable adjustments to ensure that pupils with disabilities are not placed at a disadvantage. We recognise and support all protected characteristics, including race, disability, gender, religion or belief, sexual orientation, and others.
- Public Sector Equality Duty (PSED): We have due regard to the need to:
 - Eliminate unlawful discrimination and other prohibited conduct.
 - Advance equality of opportunity between people who share a protected characteristic and those who do not.
 - Foster good relations between different groups within the school community.
- Inclusive curriculum and environment: In line with Ofsted's expectations, we provide a
 broad, balanced, and inclusive curriculum that reflects the diversity of our pupils and
 prepares them for life in modern Britain. We ensure that all pupils, including those with
 SEND, have access to high-quality teaching and learning.
- **Policies and training**: Our policies on behaviour, safeguarding, admissions, and recruitment reflect our commitment to equality. Staff receive regular training to ensure they understand their responsibilities and can support all pupils effectively.
- Monitoring and accountability: We regularly review our practices and outcomes to ensure that no group is disadvantaged. We publish equality objectives and monitor progress towards them, as required under the Equality Act.

Through these values and actions, we aim to create a school culture where everyone feels respected, valued, and able to thrive.

NYESHSPR22	Version 1	Page 1 of 18
------------	-----------	----------------------------

The plan will be made available online on the school website, and paper copies are available upon request.

Our school is also committed to ensuring staff are trained in equality issues with reference to the Equality Act 2010, including understanding disability issues.

The school supports any available partnerships to develop and implement the plan.

Our school's complaints procedure covers the accessibility plan. If you have any concerns relating to accessibility in school, the complaints procedure sets out the process for raising these concerns.

We have included a range of stakeholders in the development of this accessibility plan, including staff and governors of the school.

Legislation and Guidance

This document meets the requirements of <u>schedule 10 of the Equality Act 2010</u> and the Department for Education (DfE) <u>guidance for schools on the Equality Act 2010</u>.

The Equality Act 2010 defines an individual as disabled if they have a physical or mental impairment that has a 'substantial' and 'long-term' adverse effect on their ability to undertake normal day to day activities.

Under the <u>Special Educational Needs and Disability (SEND) Code of Practice</u>, 'long-term' is defined as 'a year or more' and 'substantial' is defined as 'more than minor or trivial'. The definition includes sensory impairments such as those affecting sight or hearing, and long-term health conditions such as asthma, diabetes, epilepsy and cancer.

Schools are required to make 'reasonable adjustments' for pupils with disabilities under the Equality Act 2010, to alleviate any substantial disadvantage that a disabled pupil faces in comparison with non-disabled pupils. This can include, for example, the provision of an auxiliary aid or adjustments to premises.

Monitoring Arrangements

This document will be reviewed every **3** years but may be reviewed and updated more frequently if necessary. It will be reviewed by the Headteacher.

It will be approved by the full Governing Board.

Links with Other Policies

This accessibility plan is linked to the following policies and documents:

- Health and safety policy
- Equality information and objectives (public sector equality duty) statement for publication
- Special educational needs (SEN) information report
- Supporting pupils with medical conditions policy
- Risk assessment policy

NYESHSPR22	Version 1	Page 2 of 18
------------	-----------	----------------------------

Schools must make reasonable adjustments in anticipation of disabled pupils' needs, not just in response to individual cases.

This includes the provision of auxiliary aids and services, such as adapted keyboards or hearing loops, where necessary.

This plan also supports the school's compliance with the Public Sector Equality Duty (PSED).

In carrying out their functions, public bodies are required to have due regard to the need to:

- Eliminate discrimination and other conduct that is prohibited by the Act,
- Advance equality of opportunity between people who share a protected characteristic and people who do not share it,
- Foster good relations across all characteristics between people who share a protected characteristic and people who do not share it.

Signed:	K Lacey Headteacher
Date:	19.11.25
Review Date:	November 2028 or as necessary.

NYESHSPR22	Version 1	Page 3 of 18

ACCESSIBILITY AUDIT CHECKLIST

1	Curriculum	YES	NO	N/A	NOTES
1.1	Do you ensure that teachers and teaching assistants have the necessary trainir to teach and support disabled pupils?				
1.2	Are classrooms arranged in a way that enables full and independent access for disabled pupils, including appropriate space, layout, and resources to support their needs?			\boxtimes	
1.3	Do lessons provide opportunities for all pupils to achieve?	\boxtimes			
1.4	Are lessons responsive to pupil diversity?	\boxtimes			
1.5	Do lessons involve work to be done by individuals, pairs, groups and the whole class?	\boxtimes			
1.6	Are all pupils encouraged to take part in music, drama and physical activities?	\boxtimes			
1.7	Do staff recognise and allow for the mental effort expended by some disabled pupils, for example using lip reading?			\boxtimes	
1.8	Do staff recognise and allow for the additional time required by some disabled pupils to use equipment in practical work?			\boxtimes	
1.9	Do staff provide alternative ways of giving access to experience or understandir for disabled pupils who cannot engage in particular activities, for example some forms of exercise in physical education?			\boxtimes	
1.10	Do you provide access to computer technology appropriate for students with disabilities?			\boxtimes	
1.11	Are school visits, including overseas visits, made accessible to all pupils irrespective of attainment or impairment?			\boxtimes	
1.12	Are there high expectations of all pupils?	\boxtimes			
1.13	Do staff seek to remove all barriers to learning and participation?	\boxtimes			
2	Approach from public transport to school entrance gates	YES	NO	N/A	NOTES
Publi	c transport to Dishforth village is limited to an infrequent bus service. The bus sto	p is on the	main ı	road ar	nd is a short walk to school.
2.1	Is the route to the school entrance from the nearest point of public transport, well signed, well lit, free of broken slabs, etc.?				Maintained by local council, poor footpath condition
2.2	Are there separate entrances for cars and pedestrians?	\boxtimes			
2.3	Is the route wide enough, and free of kerbs?		\boxtimes		1.1m – 1.5m width of path Maintained by local council, poor and narrow footpath condition
	NYESHSPR22 Version 1 Pa	ge 4 of 18			

2.4	Is there an option for a quiet route for pupils that might struggle in busy and noisy environments?			\boxtimes	This is useful for pupils with autism and/or mental health issues that are perhaps having a low mood day.					
2.5	Is the route free of such hazards as bollards and litter bins, and if these are in position, are they easily visible to someone with a visual impairment?	\boxtimes								
3	Car Parking	YES	NO	N/A	NOTES					
3.1	Is there car parking for disabled people or people with reduced mobility?				Accessible parking should be within a 50-metre distance of entrance.					
3.2	Is there an appropriate number of accessible parking spaces?	\boxtimes			General guidance is 5-6% of total parking.					
3.3	Are accessible car parking bays signposted from the car park entrance?			\boxtimes	They are clearly visible through signage above spaces.					
3.4	Are accessible parking bays marked out and easily identified?	\boxtimes			As a minimum there should be side chevrons, but ideally chevrons on three sides as you enter the parking space so people removing wheelchairs or walkers from the boot can do so safely.					
3.5	Are these bays wide enough and long enough to allow transfer onto a wheelchair?	\boxtimes								
3.6	Are the bays smooth, (free from loose stones), well lit, and signposted as being identified for disabled people only?	\boxtimes								
					NOTES					
4	External Ramps and Steps	YES	NO	N/A	NOTES					
4.1	Is the ramp properly graded, wide enough, slip resistant, with suitable handrails both sides?	YES	NO	N/A	Gradient should ideally be no steeper than 1:20.					
	Is the ramp properly graded, wide enough, slip resistant, with suitable handrails both sides? If no permanent ramp is provided, can a portable ramp be made available?		NO		Gradient should ideally be no steeper than 1:20.					
4.1	Is the ramp properly graded, wide enough, slip resistant, with suitable handrails both sides?									
4.1	Is the ramp properly graded, wide enough, slip resistant, with suitable handrails both sides? If no permanent ramp is provided, can a portable ramp be made available? 4.1 4.2 4.3	Is the ramp properly graded, wide enough, slip resistant, with suitable handrails both sides? If no permanent ramp is provided, can a portable ramp be made available? If steps are part of the route to the building, do they have contrasting nosing on the steps and a handrail?				Gradient should ideally be no steeper than 1:20. There should be a light or dark colour contrast on the front part of the step so that people with visual impairments can see it.					
4.1 4.2 4.3	Is the ramp properly graded, wide enough, slip resistant, with suitable handrails both sides? If no permanent ramp is provided, can a portable ramp be made available? If steps are part of the route to the building, do they have contrasting nosing on the steps and a handrail?		NO O		Gradient should ideally be no steeper than 1:20. There should be a light or dark colour contrast on the front part of the step so that people with visual impairments can see it.					
4.1 4.2 4.3 4.4	Is the ramp properly graded, wide enough, slip resistant, with suitable handrails both sides? If no permanent ramp is provided, can a portable ramp be made available? If steps are part of the route to the building, do they have contrasting nosing on the steps and a handrail? Do steps have lighting available?				Gradient should ideally be no steeper than 1:20. There should be a light or dark colour contrast on the front part of the step so that people with visual impairments can see it. Not used during hours of darkness					
4.1 4.2 4.3 4.4	Is the ramp properly graded, wide enough, slip resistant, with suitable handrails both sides? If no permanent ramp is provided, can a portable ramp be made available? If steps are part of the route to the building, do they have contrasting nosing on the steps and a handrail? Do steps have lighting available? Main Entrance, Lobby and Reception Areas	\ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \		□	Gradient should ideally be no steeper than 1:20. There should be a light or dark colour contrast on the front part of the step so that people with visual impairments can see it. Not used during hours of darkness					
4.1 4.2 4.3 4.4 5 5.1	Is the ramp properly graded, wide enough, slip resistant, with suitable handrails both sides? If no permanent ramp is provided, can a portable ramp be made available? If steps are part of the route to the building, do they have contrasting nosing on the steps and a handrail? Do steps have lighting available? Main Entrance, Lobby and Reception Areas Is the main entrance clearly signposted, well lit, and distinguishable from facade?	YES			Gradient should ideally be no steeper than 1:20. There should be a light or dark colour contrast on the front part of the step so that people with visual impairments can see it. Not used during hours of darkness					
4.1 4.2 4.3 4.4 5 5.1 5.2	Is the ramp properly graded, wide enough, slip resistant, with suitable handrails both sides? If no permanent ramp is provided, can a portable ramp be made available? If steps are part of the route to the building, do they have contrasting nosing on the steps and a handrail? Do steps have lighting available? Main Entrance, Lobby and Reception Areas Is the main entrance clearly signposted, well lit, and distinguishable from facade? Can people on each side of the door, either seated or standing, see each other?	YES			Gradient should ideally be no steeper than 1:20. There should be a light or dark colour contrast on the front part of the step so that people with visual impairments can see it. Not used during hours of darkness					
4.1 4.2 4.3 4.4 5 5.1 5.2 5.3	Is the ramp properly graded, wide enough, slip resistant, with suitable handrails both sides? If no permanent ramp is provided, can a portable ramp be made available? If steps are part of the route to the building, do they have contrasting nosing on the steps and a handrail? Do steps have lighting available? Main Entrance, Lobby and Reception Areas Is the main entrance clearly signposted, well lit, and distinguishable from facade? Can people on each side of the door, either seated or standing, see each other? If fitted, are door control systems fitted at heights suitable for all users? Is the door handle easy to use, of the correct type, at the right height, and tonally	YES			Gradient should ideally be no steeper than 1:20. There should be a light or dark colour contrast on the front part of the step so that people with visual impairments can see it. Not used during hours of darkness NOTES					
4.1 4.2 4.3 4.4 5 5.1 5.2 5.3 5.4	Is the ramp properly graded, wide enough, slip resistant, with suitable handrails both sides? If no permanent ramp is provided, can a portable ramp be made available? If steps are part of the route to the building, do they have contrasting nosing on the steps and a handrail? Do steps have lighting available? Main Entrance, Lobby and Reception Areas Is the main entrance clearly signposted, well lit, and distinguishable from facade? Can people on each side of the door, either seated or standing, see each other? If fitted, are door control systems fitted at heights suitable for all users? Is the door handle easy to use, of the correct type, at the right height, and tonally contrasted from the door? Does the door pressure allow ease of access for all users?	YES			Gradient should ideally be no steeper than 1:20. There should be a light or dark colour contrast on the front part of the step so that people with visual impairments can see it. Not used during hours of darkness NOTES Entrance door releases controlled by staff remotely					

5.6	Are thresholds flush and level, and mat wells firmly fixed?	\boxtimes			
5.7	Is the door wide enough for all users (800mm clear), with adequate space for wheelchair user to open door?	\boxtimes			External door requirements: new build 1000mm, existing/older build 775mm. If they are manual wide double doors, consider not having both open as this can hinder the entrance of wheelchair users and people pushing buggies
5.8	If fitted, does the lobby allow wheelchair users to move clear of the outer door before opening the inner door?	\boxtimes			
5.9	Is appropriate information signage provided at the reception, for people with visual impairments or others with lower sight levels (wheelchair users)?	\boxtimes			
5.10	Have front line staff (reception) had access awareness/ equality training?	\boxtimes			
		•			
6	Corridors, horizontal movement and activity spaces	YES	NO	N/A	NOTES
6.1	Are corridors a minimum width of 1500mm? (Better to be 1800mm for wheelchairs to pass each other)			\boxtimes	1.5 meters is the recommended minimum width, although some historic and older buildings may be narrower than this.
6.2	Does natural and artificial lighting avoid glare and silhouetting for people with visual impairments?	\boxtimes			
6.3	Do "communication/activity spaces" have good acoustics, and the provision of an induction loop?			\boxtimes	
6.4	Are suitable signs provided, from both standing and seated positions, where necessary?	\boxtimes			
6.5	Are fire extinguishers positioned to ensure they do not create hazards for visually impaired people?	\boxtimes			
7	Doors	YES	NO	N/A	NOTES
7.1	Can fire doors be held open on magnetic devices?	\boxtimes	\boxtimes		Variable for different doors around school
7.2	Are doors well contrasted from their surroundings?	\boxtimes	\boxtimes		Variable for different doors around school
7.3	Are door handles easy to use, of the correct type, at the right height, and tonally contrasted from the door?	\boxtimes			Lever handles are better than round handles and should be at a height that is easy to access.
7.4	Can people on each side of the door, either seated or standing, see each other?	\boxtimes			
7.5	Are doors wide enough for all users (800mm clear)	\boxtimes			Internal door requirements: new build 800-825mm, existing 750-775mm
7.6	On the opening side of the door, is there at least 300 mm of clear space to allow a user to grasp the handle and swing the door past a wheelchair footplate or walker?	\boxtimes			Required under Approved Document M Volume 2 – Buildings other than dwellings
7.7	If double doors, does one leaf allow 800mm clear opening width?	\boxtimes			Internal door requirements: new build 800-825mm, existing 750-775mm
	NYESHSPR22 Version 1 Page	6 of 18			

8	Vertical movement, internal I	evel change		YES	NO	N/A	NOTES
8.1	•	ough, with suitable handrails both sides?)			\boxtimes	
8.2	Are surfaces slip resistant, with kerbs	at the edges?				\boxtimes	
8.3	If no permanent ramp is provided, car	n a portable ramp be made available?				\boxtimes	
8.4	easily identifiable step nosing?	ne ramp, with suitable treads and rises, w				\boxtimes	
8.5	Are the steps maintained, well lit, with warnings at the top and bottom?	n suitable handrails both sides, and tactile	е			\boxtimes	
9	Vertical movement, Stairs			YES	NO	N/A	NOTES
9.1	identifiable through colour change?	s consistent, and are step nosings clearly				\boxtimes	Additionally, consider checking the type and depth of step to ensure evac chairs can be used where relevant
9.2	300mm beyond the top and bottom of		tend			\boxtimes	
9.3	If there are landings are they large er manoeuvres, and are they provided in					\boxtimes	Consider a range of users and potentially supporting people/dogs, plus people needing to evacuate using an evac chair.
9.4	Is suitable visual and tactile information	on fitted at each floor level?				\boxtimes	
9.5	Is any short rise within a single storey indicated, and is it slip-resistant?	ramped; if so, is the ramped surface				\boxtimes	Range length 3m max = 1 in 12 gradient. Ramps should look at having the least gradient possible, aim for 1 in 20 and work backwards from this gradient.
9.6	Is there suitable lighting?					\boxtimes	-
10	Vertical movement, Passenç stairlifts	ger Lifts, platform lifts and platfo	orm	YES	NO	N/A	NOTES
10.1	Is a passenger lift provided within th	e school?				\boxtimes	
10.2	Is there unobstructed space (1500m doors have a clear opening width of	nm x 1500mm) in front of the doors, and c 800mm?	do the			\boxtimes	
10.3	2000mm) min, and is the lift fitted wi	t cabin 1100 x 1400mm (preferred 1100 at the suitable support rails on three sides??	?			\boxtimes	
10.4		in the lift cabin, including emergency pho for all users (within zone of 900mm and				\boxtimes	
Ī	NYESHSPR22	Version 1	Page 7	of 18			
_	-	·					

10.5	Are these controls clearly visible in contrasting colours and with raise (tactile) characters/numbers?			\boxtimes	
10.6	Does the lift have audible announcements and visual displays?			\boxtimes	
10.7	Is a platform lift or platform stairlift provided within the school? Note - platform stairlifts are not advisable.			\boxtimes	
10.8	Are the controls at both levels and within the lift identifiable, and reachable from sitting and standing levels, and have a handrail for people with limited balance? Is audio/visual information available for blind people?			\boxtimes	Controls to call the lift should be around 900mm from the ground, same as internal controls which should also have tactile markings so blind people know what button they are pressing. Is there audible and visual information regarding the floor people are on? Is there a handrail for people with limited balance?
10.9	Does the stairlift platform when not in use automatically revert to folded position?			\boxtimes	
			1		
11	WC Provision Generally	YES	NO	N/A	NOTES
11.1	Is there WC provision for ambulant people with disabilities? (eg. Grab rail fitted to one WC cubicle)	\boxtimes			
11.2	Is the lobby large enough to allow easy access, and is the WC door easy to operate?	\boxtimes			
11.3	Are the floors slip resistant?	\boxtimes			Consider people with limited sight, those using walking aids and wheelchair users.
11.4	Are washing and drying facilities at a height and have the access for a wheelchair user to use?	\boxtimes			
11.5	Are fittings easily distinguished from their background?	\boxtimes	\boxtimes		Variable around school
11.6	Are compartment doors controls easily gripped and operated?			\boxtimes	
11.7	Can ambulant disabled people manoeuvre and rise and lower themselves in a standard cubicle?	\boxtimes	\boxtimes		Variable around school
11.8	Are toilet paper holders, soap dispensers of a type and location that is easily used by people with limited dexterity or movement	\boxtimes			
12	Accessible WC Provision	YES	NO	N/A	NOTES
12.1	Is the accessible toilet large enough to permit manoeuvre for frontal lateral/angled/backward transfer, with or without assistance?	\boxtimes			Accessible toilet should be 2200mm x 1500mm minimum to allow manoeuvring. Consider if toilets are all left or right transfer and if there is a mix. In smaller toilets people might turn their chair at an angle and transfer from the front; if this is the case a folding handrail is needed. Larger toilets might allow both left and right transfer and hoist access.
	NYESHSPR22 Version 1 Page 8	3 of 18			

12.2	Is the manoeuvring area free of obstruction, e.g. boxed-in pipework/radiators/cleaner's equipment/disposal bins/ occasional storage, etc.,	\boxtimes			
	and is any difficulty caused by the activity of service contractors?				
12.3	Is the flush on the same side as a person would transfer to make it easier to reach?	\boxtimes			
12.4	Is the toilet seat height between 480 mm and 500 mm from the finished floor level?	\boxtimes			
12.5	Is the toilet seat firm and stable, not soft or cushioned?	\boxtimes			
12.6	Does the toilet seat contrast visually with the toilet pan and surrounding surfaces?	\boxtimes			
12.7	Is a backrest provided?		\boxtimes		
12.8	Is the toilet seat in the accessible toilet provided without a lid, ensuring unobstructed access for users with mobility challenges?		\boxtimes		Lids can pose difficulties for those needing assistance or using mobility aids when accessing the toilet. By keeping the toilet bowl open, it allows for easier manoeuvrability and transfers.
12.9	Is the entry door to the accessible toilet of a type that is easily used by a range of people with limited mobility?	\boxtimes			
12.10	Can ambulant disabled people manoeuvre, raise and lower themselves in standard cubicles?	\boxtimes			
12.11	Is there a shelf available near the toilet for people to use?	\boxtimes			This is used for people that might have to change a medical appliance or need specific equipment; consider location.
12.12	Is the soap dispenser and toilet roll holder of a type that is easily used by a range of people and appropriately positioned for ease of use?	\boxtimes			
12.13	Are the door fittings/locks and light switches easily reached and operated?	\boxtimes			
12.14	Is there an emergency call system and is someone designated to respond?		\boxtimes		Consider where the alarm call goes to. Does it just ring outside the toilet or go to a designated office so assistance can be alerted quicker?
12.15	Can the emergency call system be operated from floor level?		\boxtimes		Often these are tied up or put up high to avoid being accidentally pulled, but they are full length for a reason.
12.16	tollet?	\boxtimes			This can be a complex area – consider looking at recommended guidance but usually consists of grab rails on both sides of the toilet, with the one on the transfer side being drop-down to allow flexibility.
12.17	tollet?	\boxtimes			
12.18	Are the taps appropriate for use by someone with limited dexterity, grip or strength?	\boxtimes			Lever or automatic taps are the best design for all.
		1 1	1	Т	
13	Changing/Shower Facilities	YES	NO	N/A	NOTES
ſ	NYESHSPR22 Version 1 Page 9	of 18			
<u> </u>	1				

13.1	Are there changing facilities?			\boxtimes	
13.2	Do you offer discrete changing facilities for people that need them?			\boxtimes	
13.3	Within the main changing area or accessible toilet, are there accessible shower facilities?	ing		\boxtimes	
13.4	Is the height of the shower head variable?			\boxtimes	
13.5	Have a tip-up seat and suitable handrails been provided?			\boxtimes	
13.6	Is there a dressing cubicle and does it comply with required size and layout?			\boxtimes	
13.7	Are lockers easily reached and operated?			\boxtimes	
13.8	Are all fittings readily distinguishable from their background?			\boxtimes	
13.9	Does the floor have a slip resistant finish?			\boxtimes	
		<u>.</u>			
14	Bathrooms	YES	NO	N/A	NOTES
14.1	Is there a bathroom?			\boxtimes	
14.2	Is the bathroom provided with fittings suitable for use by people with disabilities including assisted use?			\boxtimes	
14.3	Are all fittings easily reached and operated?			\boxtimes	
14.4	Are all fittings readily distinguishable from their background?			\boxtimes	
14.5	Does the floor have a slip resistant finish?			\boxtimes	
14.6	Is a hoist provided?			\boxtimes	
15	Horizontal Movement Fixtures and Fittings	YES	NO	N/A	NOTES
15.1	Is each corridor/passageway/aisle wide enough for a wheelchair user to manoeuvre and for other people to pass?				1.5 meters is the recommended minimum width, although some historic and older buildings may be narrower than this.
15.2	Is each corridor free from obstruction to wheelchair users and from hazards to people with impaired vision?				This could be furniture or apparatus such as fire extinguishers sticking out but not obvious, due to colour contrast or other objects obscuring them. This could also be 'dog legs' in the corridor or where rooms go out onto corridors that pose a risk of people walking into others; viewing mirrors on the ceiling can help with this.
15.3	Are there good colour contrasts between walls, doors and flooring to enable people with a visual impairment to navigate and detect hazards?		\boxtimes		There should be at least a 30-point LRV difference in colour. (LRV value is on all colour cards found in paint shops – 1 is white, 100 is black) This varies across school
Γ	NYESHSPR22 Version 1 Pa	ge 10 of 18	}		

15.4	Are arrangements in place for alternative arrangements for people who may struggle with noisy or echoey spaces, including corridors?	\boxtimes		This can have a negative impact on some people that are hard of hearing, some people with Neuro-diversity and people with visual impairments and can be partially avoided by having some furniture that sound bounces off, or soft art on the walls/ceilings that absorbs noise.
15.5	Do lobbies allow all users to clear one door before approaching the next with minimal manoeuvre?	\boxtimes		Lobbies can be any area where there is an entrance door and exit door to the destination area, usually quite small. Example: some toilets have a small lobby between the corridor and toilet or corridor to a lift.
15.6	Is turning space in lobbies adequate?	\boxtimes		Normally marked as a 1.5 metre area, but some powered chairs might need a larger area.
15.7	Are doors within corridors and entering rooms accessible?	\boxtimes		
15.8	Does natural and artificial lighting avoid glare and silhouetting for people with visual impairments?	\boxtimes		This could be the way the sun casts shadows in a corridor or room that makes it difficult for people with a visual impairment to see the route or layout of a room clearly. This could also be objects put on windows that cast shadows.
15.9	Are there visual clues for people to navigate?	\boxtimes		These are usually floor numbers, names of rooms, specific colours or directional markings that helps people understand where they are and indicate where people need to go to reach a specific area.
15.10	Do floor surfaces allow ease of movement for wheelchair users?			Consider things like different flooring e.g. lots of changes from carpet to hard floor to rubber and if there are raised lips between. How thick the pile is in the carpet? This can make wheeling difficult.
15.11	Do floor surfaces avoid light reflection and sound reverberation?	\boxtimes		Lots of different flooring e.g. shiny floors with glare to matt flooring and back can make navigation difficult for some people. Empty corridors with hard surfaces can make sound reverberate and make it difficult to understand conversations or announcements. Well-positioned furniture or soft art on the walls can make a lot of difference.
15.12	Are direction and/or information signs visible from both sitting and standing eye levels? Are they in sentence case, and large enough type to be read by those with impaired vision?	\boxtimes		As with external signage consideration should be given to location, contrast, fonts and imagery used.
15.13	Is lighting designed to meet a wide range of needs?		\boxtimes	The type of lighting can make a difference for people with visual impairments and some people with neurodiverse conditions; the general rule is corridors and general areas should be around 300 lux and reception/where ICT is being used around 500 lux. Variable around school.
15.14	Are rooms maintained to reduce hazards for people with visual disabilities?	\boxtimes		

NYESHSPR22	Version 1	Page 11 of 18
1112311311122	V C. 3.0.1. 1	. age == 0. =0

15.15	Are there quiet spaces for people to go when needed?	\boxtimes			Some people may have low moods or sensory overload; having a quiet area will help them manage this.
15.16	Can you adjust lighting and noise to be softer to reduce stress and sensory overload in specific areas?		\boxtimes		Bright lighting can have a negative impact on some people that struggle with sensory overload or have some forms of visual impairment, being able to dim the lights within an area/room can help people self-manage
15.17	Are seating arrangements/spaces suitable for use by people with visual impairments?	\boxtimes			Consider the layout of the room, and the colour contrast of chairs/tables to background colours. Good contrast can help people navigate and be independent.
15.18	Are seating arrangements/spaces suitable for wheelchair users/people with limited balance?	\boxtimes			Consider how wheelchair users access seating areas and tables: can they be part of their group/class or do they have to sit separately from their classmates? Do chairs have solid or locking wheels to stop them from moving if a person is transferring, and do some chairs have arm rests to help people stand? A mixed environment is best. Can wheelchair users access and get their legs under tables?
15.19	Are furniture, whiteboards, books, resources etc. at a height and location that allows them to be accessed by all?	\boxtimes			Consider height so that all can reach and interact, and consider location regarding obstacles preventing people to access.
15.20	Are serveries/counters accessible to all users, including those with hearing impairments?			\boxtimes	Food serveries in shops and restaurants can enable people to be independent if at the right height (approx. 700mm) and designed correctly. Where this isn't possible, is there someone available to assist? Is there a hearing loop at the till serving area? Are menus and other information easy to read or is there assistance available for people that may need it?
15.21	If the building has fixed seating are there also associated spaces for wheelchair users and at regular intervals on long routes?			\boxtimes	This might be in assembly, in the dining area or in a sports hall where fixed seating or benches are used.
15.22	Is it possible for wheelchair users and people with other disabilities to approach and use all vending machines/drinking water dispensers etc.?			\boxtimes	Consider height of coin slot, information displayed and how items are dispensed.
15.23	Are all fittings readily distinguishable from their background?				This could be switches, power door pads, coat hooks or other fixtures. Good contrast between walls and fixtures will help independence. This doesn't mean redecorating; having a contrasting colour plate behind the fixture will help.
15.24	Where there are display stands, bookstalls etc., are they visible/reachable/accessible by people with disabilities?	\boxtimes			
15.25	Is any staff accommodation suitable for use by people with disabilities including wheelchair users, with slip-resistant floor, reduced-level kitchen units and sink and lever action taps?		\boxtimes		
15.26	Is the main reception area equipped with induction loops for people with hearing aids?		\boxtimes

17.5 17.6 17.7	places of safety or refuge, which are clearly signed and of the right size? Are there Personal Emergency Evacuation Plans in place for everyone who may require assistance? Are external fire points and routes accessible and monitored?				A Personal Emergency Evacuation Procedure is an individual evacuation plan for a pupil or staff member. Consider the route and how accessible it is to any assembly points, e.g. gradients, surfaces such as gravel or grass, potential obstacles such as within car parks.
	Are there Personal Emergency Evacuation Plans in place for everyone who may			\boxtimes	evacuation plan for a pupil or staff member.
17.5	places of safety or refuge, which are clearly signed and of the right size?				
47.5	If people with disabilities cannot completely evacuate the building, can they reach			\boxtimes	
17.4	Are Fire Evacuation Plans in position to ensure disabled people are evacuated safely?			\boxtimes	
17.3	Are fire exit routes accessible to all, including wheelchair users?	\boxtimes			Consider signage, length of route and potential obstacles. Are there two routes for people to evacuate?
17.2	Is the audible fire alarm supplemented by a flashing light system?		\boxtimes		
17.1	Is there an audible alarm system?	\boxtimes			
17	Means of Escape	YES	NO	N/A	NOTES
16.5	Does the floor have a slip resistant finish?				
16.4	Is lighting adequate?				
16.3	Are all fittings readily distinguishable from the background?	\boxtimes			
16.2	Is the kitchen of adequate size and layout for disabled people?		\boxtimes		
16.1	If provided, does the kitchen have fittings suitable for use by disabled people?		\boxtimes		
16	Kitchens	YES	NO	N/A	NOTES
					people with hearing aids to use a telephone.
15.31	Are telephones fitted with inductive loop couplers?	\top_{\Box}	\boxtimes		This will be in the specification of the telephones; it better enables
15.30	Is the functioning and operation of induction loops checked regularly?		\boxtimes		Should be checked at least monthly, ideally more.
15.29	Are relevant induction loops within teaching areas linked to A/V equipment?		\boxtimes		This will enable some people to better hear video and audio content or be part of a video/audio call.
15.28	If induction loops are not fitted in all areas, do you have portable induction loops available for deaf and hard of hearing people?		\boxtimes		As above
15.27	Are all areas for assemblies/meetings equipped with an induction loop system?		\boxtimes		Some areas may not be suitable and there are different solutions depending on building, location and need – consider getting advice.

18.1	Are the external routes (including s free from surface water, ice and sn	teps and ramps) kept clear, unobstructed ow?	and 🗵				
18.2		only used by disabled drivers and are kep	t 🗵]		
18.3	Is door ironmongery regularly main	tained?	×				
18.4	Are lifts, platforms and stairlifts reg	ularly serviced?				\boxtimes	
18.5	Are accessible WCs kept clear and	I not used for storage?	\boxtimes				
18.6	Are appropriate cleaning materials of slip resistant floors does not make	used to ensure that the cleaning and polis to them shiny / slippery?	shing				
18.7	Do you consider tonal and colour c	ontrast before a redecoration scheme?	\boxtimes				
18.8	Do new signs integrate effectively v		\boxtimes
