

Intent

To teach memorable and enjoyable music lessons where children learn to love music and talk confidently about music. To give every child the opportunity to play a musical instrument.

Implementation

Use of the Charanga scheme to ensure full coverage of the national curriculum objectives. Whole class teaching of musical instruments by specialist teachers and by class teachers.

Impact

Children enjoy and can talk about music. Every child has had the opportunity to produce music and to perform in front of others.

How children with additional needs are supported

Pre teaching and extra practise time. Supported during lessons with accessible resources and adult support if needed. Extra practise to learn and understand music related vocabulary. Headphones are available to children who find loud noises difficult.

How more able children are challenged

Opportunities for extra practise or to join a small ensemble group to perform more challenging pieces of music. Giving children the opportunity to compose their own music and perform to others.

The focus in my subject this year is:

To change our musical instrument offer to the ukulele

Monitoring plans for my subject this year are:

Music lessons learning walk, pupil voice.
Review of music videos of lessons saved on sharepoint

Previous improvements and impact

Take our musical performances out of school and into our local community. Our school choir visited care homes and nurseries to perform, we also had a whole school music concert where every child performed individually or as part of a group. These were well received.

Current improvements

The introduction of the Ukuleles and supporting teachers to be able to teach Ukuleles using our Charanga Subscription.

Ideas for future Improvements

Have a lunch time club for children who want to take their Ukulele playing further.

Pupil Voice

Lots of KS2 children wanted to learn how to play guitar so we bought Ukuleles for the children to learn in school.
Most children speak positively of their music lessons and enjoy singing and listening to music.

Data/Outcomes

Most children are meeting the expected level for their year group.
